**Re: Donation to “Computers for Charities” by the DARC Technology Club, Derbyshire**

The DARC Technology Club started at a time when the world was a different place, and it provided information and expertise in a friendly environment. It grew to become one of the nationally most well-known clubs focusing on computers at a time when we were able to get key figures in the industry to come and talk to us.

Now, a quarter of a century later, technology is very different – so much more powerful and available to far more people than ever before. Clubs are no longer the essential entities that they used to be, and so, as the DARC Technology Club comes to the end of the road, it seems fitting that the legacy funds from the club are passed on to “**Computers for Charities**”, an organisation that shares so many of the aims and objectives of the DARC Technology Club.

We know that the money will be put to good use, and as the final Chairman I would like to thank everyone who has made the club such an epic and enjoyable experience – all of the founders, members, committee members, and speakers. I hope every once in a while, you might think back to some of the outstanding DARC meetings and smile.

**Bimal Jangra, Chairman, DARC Technology Club 2017–2022**
